# Session 15 (AIML) - Assignment Questions

Name: **Vaishnavi Praveen Rathi**

College: **Zeal Polytechnic, Narhe, Pune**

Branch: **Artificial Intelligence and Machine Learning (AIML)**

Domain: **AIML (Artificial Intelligence and Machine Learning)**

Github Repo Link : [https://github.com/vaishnavi-rathiii/mountreach.solutions.internship-aiml-tasks\\_assignments](https://github.com/vaishnavi-rathiii/mountreach.solutions.internship-aiml-tasks_assignments)

Github File Link : [https://github.com/vaishnavi-rathiii/mountreach.solutions.internship-aiml-tasks\\_assignments/tree/main/Assignment15](https://github.com/vaishnavi-rathiii/mountreach.solutions.internship-aiml-tasks_assignments/tree/main/Assignment15)

Dataset Used: Kaggle – Countries of the World Dataset  
<https://www.kaggle.com/datasets/fernandol/countries-of-the-world>

---

## Program Output:

### 1. Import the Pandas library.

```
[1]: """ ASSIGNMENT 15 """  
    '''  
    Countries Dataset - Data Reading, Loading, Exploration, and Understanding  
    '''  
  
[1]: '\nCountries Dataset - Data Reading, Loading, Exploration, and Understanding\n'  
  
[2]: # Importing Libraries  
      import pandas as pd  
      import numpy as np
```

### 2. Load the CSV dataset into a DataFrame.

```
[18]: # Load the dataset  
  
      df = pd.read_csv("countries of the world.csv")
```

### 3. Display the first 5 rows of the dataset.

```
[20]: # Display first 5 rows  
df.head()
```

|   | Country        | Region               | Population | Area (sq. mi.) | Pop. Density (per sq. mi.) | Coastline (coast/area ratio) | Net migration | Infant mortality (per 1000 births) | GDP (\$ per capita) | Literacy (%) | Phones (per 1000) | Arable (%) | Crops (%) | Other (%) | Climate | Birthrate | Deathrate | Agriculture |
|---|----------------|----------------------|------------|----------------|----------------------------|------------------------------|---------------|------------------------------------|---------------------|--------------|-------------------|------------|-----------|-----------|---------|-----------|-----------|-------------|
| 0 | Afghanistan    | ASIA (EX. #### 5. Show the number of rows and columns.

```
[23]: # Display number of rows and columns
print("Shape:", df.shape)
```

Shape: (227, 20)

#### 6. Display all column names.

```
[9]: # Display column names
print(df.columns)
```

Index(['Country', 'Region', 'Population', 'Area (sq. mi.)', 'Pop. Density (per sq. mi.)', 'Coastline (coast/area ratio)', 'Net migration', 'Infant mortality (per 1000 births)', 'GDP (\$ per capita)', 'Literacy (%)', 'Phones (per 1000)', 'Arable (%)', 'Crops (%)', 'Other (%)', 'Climate', 'Birthrate', 'Deathrate', 'Agriculture', 'Industry', 'Service'], dtype='object')

## 7. Show dataset information, data types, and non-null values.

```
[10]: # Display dataset information
df.info()

<class 'pandas.core.frame.DataFrame'>
RangeIndex: 227 entries, 0 to 226
Data columns (total 20 columns):
 #   Column                                  Non-Null Count  Dtype
---  -
 0   Country                                227 non-null    object
 1   Region                                227 non-null    object
 2   Population                             227 non-null    int64
 3   Area (sq. mi.)                        227 non-null    int64
 4   Pop. Density (per sq. mi.)            227 non-null    object
 5   Coastline (coast/area ratio)          227 non-null    object
 6   Net migration                         224 non-null    object
 7   Infant mortality (per 1000 births)    224 non-null    object
 8   GDP ($ per capita)                    226 non-null    float64
 9   Literacy (%)                          209 non-null    object
10   Phones (per 1000)                     223 non-null    object
11   Arable (%)                            225 non-null    object
12   Crops (%)                             225 non-null    object
13   Other (%)                             225 non-null    object
14   Climate                               205 non-null    object
15   Birthrate                             224 non-null    object
16   Deathrate                             223 non-null    object
17   Agriculture                           212 non-null    object
18   Industry                              211 non-null    object

dtypes: float64(1), int64(2), object(17)
memory usage: 35.6+ KB
```

## 8. Generate summary statistics for numerical columns.

```
[11]: # Display summary statistics
df.describe()
```

[11]:

|       | Population   | Area (sq. mi.) | GDP (\$ per capita) |
|-------|--------------|----------------|---------------------|
| count | 2.270000e+02 | 2.270000e+02   | 226.000000          |
| mean  | 2.874028e+07 | 5.982270e+05   | 9689.823009         |
| std   | 1.178913e+08 | 1.790282e+06   | 10049.138513        |
| min   | 7.026000e+03 | 2.000000e+00   | 500.000000          |
| 25%   | 4.376240e+05 | 4.647500e+03   | 1900.000000         |
| 50%   | 4.786994e+06 | 8.660000e+04   | 5550.000000         |
| 75%   | 1.749777e+07 | 4.418110e+05   | 15700.000000        |
| max   | 1.313974e+09 | 1.707520e+07   | 55100.000000        |

## 9. Display the data type of each column.

```
[12]: # Display data types
print(df.dtypes)
```

|                                    |         |
|------------------------------------|---------|
| Country                            | object  |
| Region                             | object  |
| Population                         | int64   |
| Area (sq. mi.)                     | int64   |
| Pop. Density (per sq. mi.)         | object  |
| Coastline (coast/area ratio)       | object  |
| Net migration                      | object  |
| Infant mortality (per 1000 births) | object  |
| GDP (\$ per capita)                | float64 |
| Literacy (%)                       | object  |
| Phones (per 1000)                  | object  |
| Arable (%)                         | object  |
| Crops (%)                          | object  |
| Other (%)                          | object  |
| Climate                            | object  |
| Birthrate                          | object  |
| Deathrate                          | object  |
| Agriculture                        | object  |
| Industry                           | object  |
| Service                            | object  |
| dtype:                             | object  |

## 10. Count missing values in each column.

```
[13]: # Count missing values
print(df.isnull().sum())
```

|                                    |       |
|------------------------------------|-------|
| Country                            | 0     |
| Region                             | 0     |
| Population                         | 0     |
| Area (sq. mi.)                     | 0     |
| Pop. Density (per sq. mi.)         | 0     |
| Coastline (coast/area ratio)       | 0     |
| Net migration                      | 3     |
| Infant mortality (per 1000 births) | 3     |
| GDP (\$ per capita)                | 1     |
| Literacy (%)                       | 18    |
| Phones (per 1000)                  | 4     |
| Arable (%)                         | 2     |
| Crops (%)                          | 2     |
| Other (%)                          | 2     |
| Climate                            | 22    |
| Birthrate                          | 3     |
| Deathrate                          | 4     |
| Agriculture                        | 15    |
| Industry                           | 16    |
| Service                            | 15    |
| dtype:                             | int64 |

## 11. Count unique values in each column.

```
[14]: # Count unique values
print(df.nunique())
```

|                                    |       |
|------------------------------------|-------|
| Country                            | 227   |
| Region                             | 11    |
| Population                         | 227   |
| Area (sq. mi.)                     | 226   |
| Pop. Density (per sq. mi.)         | 219   |
| Coastline (coast/area ratio)       | 151   |
| Net migration                      | 157   |
| Infant mortality (per 1000 births) | 220   |
| GDP (\$ per capita)                | 130   |
| Literacy (%)                       | 140   |
| Phones (per 1000)                  | 214   |
| Arable (%)                         | 203   |
| Crops (%)                          | 162   |
| Other (%)                          | 209   |
| Climate                            | 6     |
| Birthrate                          | 220   |
| Deathrate                          | 201   |
| Agriculture                        | 150   |
| Industry                           | 155   |
| Service                            | 167   |
| dtype:                             | int64 |

## 12. Display 5 random rows from the dataset.

```
[15]: # Display 5 random rows
df.sample(5)
```

|     | Country      | Region             | Population | Area (sq. mi.) | Pop.
